

Ideation Phase

Empathize & Discover

Date	27 June 2026
Team ID	SWTID-2026-2260
Project Name	Smart Lender
Maximum Marks	4 Marks

Empathy Map :

The Empathy Map helps identify the needs, thoughts, emotions, and challenges of users involved in the loan approval process. It provides a better understanding of both loan applicants and bank loan officers by analyzing what they think, feel, hear, see, say, and do during the application process. This analysis highlights the key pain points, such as lengthy verification, manual processing, and uncertainty in loan approval, while also identifying opportunities to improve the user experience. The insights gained from the empathy map guided the development of the Smart Lender system, enabling faster, more accurate, and user-friendly loan approval predictions using machine learning.

Example: Smart Lender
